In the original article, the y axis tick marks in Fig. 8 were labeled incorrectly and are off by a factor of 10. This error in the depicted magnitudes of all values does not, however, change any of the arguments and assertions made in the paper that refer to this figure as it is meant to illustrate the relative variability of cumulative CO₂ fluxes between different tower locations and years. Other sections of the paper are not affected by this error. Figure 1 in this document replaces the original Fig. 8.
Figure 1. Comparison of cumulative CO$_2$ flux sums of different years and tower locations during the same day-of-year range. Replaces Fig. 8 in original article.
